

Collaborate with the **PALM Network**

The **PALM Mentoring Network** is actively seeking society/institution partners to collaborate in broadening participation in undergraduate active learning reform. Join with the ASCB, ASM, SACNAS, ASPB, APS, GSA, and Morehouse College and help promote our shared educational interests.

The PALM Network Grant

up to **\$2000** per Fellow / **\$500** mentor stipend, and **\$1000** meeting travel each for Fellow and mentor

With PALM your society will:

- Be part of a network of professional societies dedicated to growth and excellence in evidence-based life science education
- Support your members in their professional development in teaching lecture classes
- Cultivate a culture of respect for high quality teaching and learning in life sciences
- Deepen inclusion and diversity in life science education
- Introduce your society's members to a program that develops their teaching careers while supporting them in their teaching practices

PALM Fellows will:

- Gain mentorship with leaders in undergraduate biology teaching and learning
- Learn best practices in teaching and in assessing active learning in lecture classes
- Create an original teaching module that engages students in active learning
- Join a community of scientists dedicated to active teaching and learning, and share ideas and support
- Participate in Fellow-mentor journal clubs, meetings, and networking opportunities
- Obtain invaluable career development for faculty careers
- Be part of a network of scientific societies dedicated to supporting scientists in teaching and learning careers

Interested in bringing your organization onto the Steering Committee?
